

DAILY ONE 1/7/2010

Here is a civil lesion for those people who still believe in the U.S. Constitution and state constitutions. Our u.S.A. constitutions both state and federal have gone through evolutionary process; past constitutions made provisions for the peoples law where the people are sovereign (county level) and legislators law which is state/county statutory laws. These old constitutions were designed to accommodate one class of citizenship: Ref 1849 California Constitution and the 1781 U.S.A Constitution. Our whole world changed with the *Civil Federal Wars of U.S.A.* What changed? Our old republic was replaced with a New Form of Government called a *Democracy*. So what is this *Democracy*? It's a form of government where we the people are no longer sovereign. We the people were blended with other foreign people and governed by statutory 14th amendment laws, rather than the people's old common law. So when we observe the evolution of constitutions we see that our laws were changed by federal/State legislative 14th amendment statutory adopted laws. This would mean that the new sovereign was the federal government body called (congress) and the people became congresses subjects by silent acceptance of statutory contract law of the ruler known as Equity/martial law rule. The district of Columbia/federal government would rule over the several states people by converting these alleged States of sovereign people's contracts into federal unincorporated business organizations where you loose your individual sovereign status of a dejure state and become a subject/contractee of this new form of ruler's government. You were also by the late 1930 converted into a debtor rather than a creditor by you subjugating yourself to a new world order where your common law (peoples law of God), money(Gold and silver), property rights (allodium titles) were replaced by a martial law rule under civil law ruler ship (congress). So this type of written private international statutory law now rules over you as a debtor. The people's laws as a sovereign were replaced by your silent acceptance by your ignorance of statutory laws and then you wonder why you are no longer in charge of things. We have been sold a bill of goods that are deceptive unless you are a student of history and understand the English language you have no tools to discover what has injected this cancer that leaves you so dumbfounded. Welcome to tyranny and blame yourself, schools, parents, and government representatives and church minister who teach a perverted sense of Gods works controlled by the State under a 501 C3 license requirements. YOU put us here; now do something to get us out!
